Arvada Fire & COVID-19 (Coronavirus)

The following prevention measures are being taken:

• JeffCom dispatchers have been and will continue to screen patients who call with related symptoms.

• If COVID-19 is suspected crews will limit exposure by wearing head to toe personal protective equipment. The patient exam will be limited to one care giver.

• If the patient needs to go to the hospital Arvada crews will take steps to create an isolation area in the ambulance and will call ahead to the designated hospital so staff there can prepare for the patient’s arrival.

• After the call crews will follow new disinfection and decontamination protocol.

For questions call the CO HELP line: 877-462-6057

In order for us to provide the highest level of service please contact your primary care physician with non-life threatening flu like symptoms prior to calling 911.
