## Response Checklist – COVID-19 v.17

### Updated guidelines for confirmed or suspected COVID-19 responses/decon

This Special Order updates the **Response Checklist – COVID 19** to version 17 and supersedes version 16 that was released on 3/17/20. This updated Response Checklist – COVID 19 is based on the latest understanding of this outbreak and, as conditions change, the checklist will also be updated. The checklist contains a version number and issue date highlighted in **blue** at the top of each page. The updated document is contained within SO 20-009B Attachment A.

This is a living document and any recommendations for improvement should be submitted to the EMS Division. Any updates will be released by supplemental Special Order. Please review this document at the start of each shift.

Because of the logistics of lamination and the need to issue the document in a rapid manner, Response Checklist – COVID-19 v.16 has been distributed as a paper version. Clear sleeves are being purchased for distribution that the updated versions of the document can be placed within.
